NEW CARLO GIORDANO ELECTRIC CELLO

After a great deal of cajoling, we are pleased to be able to announce that Carlo Giordano have extended their Electric Instrument Range to include the Electric Cello. The Instrument is currently in stock, fully setup and available for immediate despatch. The cello, as expected is equally as good as the electric violins that have been available for several years, and benefits from the same quality standards. The innovative fold down rear extension, makes it comfortable and easy to play. Supplied with headphones, and a battery (PP3) already fitted, it merely needs tuning, and it is ready to play. The Brazilwood bow is also included, as is a soft cover. This instrument is a really attractive addition to our range, providing a reasonably priced Electric Cello for any player. Also supplied is the lead to connect to an amplifier, with a ¼" jack.
